REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed freeze drying process and apparatus with a product container shelf inside a drying chamber with the feature of calculating the product condition as a function of a generated signal and either adjusting the shelf to a target product temperature or modulating the shelf temperature and drying chamber pressure after the generated signal is not found in the prior art either singly or in combination. This considered patentably distinct feature is found in each of independent claims 1, 10, and 14. The closest prior art reference is considered Lambert (US 6,643,950) which teaches a freeze drying system with temperature and pressure control based on parameters entered by a user but not the considered patentably distinct independently claimed generated signal feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).
